

FUBA 3.0 Rulebook ERRATA

01.01.2022

4.2.3 New ball value

...if the target area is adjacent to **OR SAME AS** the start area...

The new ball value is declared according the smaller die value also if the ball is played inside the same area.

4.2.4 Order of actions

...equal to or higher than the **OLD** ball value...

The dice values are compared to the OLD ball value, not the new value. The example in the box cover is correct. I.e. the order of actions is declared according to how many dice succeeded in the control check.

A11 Skills, Gegenpressing

This skill can be played **AFTER** the opponent's successful pressing action.

This gives clear order for the skills if the opponent has skilled wing backs.

A13 Special events

Chapter number A13 -> A12

Attacker's rude foul: PT dice value for the event should be 6 instead of 5.
